

# KARAHAN

## Airborne Gun Pod System

KARAHAN is a mission-tailored airborne gun pod integrating the CKR-503 Gatling-type weapon system to deliver sustained, high-density firepower for close air support operations. Its aerodynamically optimized structure and downward-angled configuration enable effective engagement without low-altitude exposure, while the MIL-STD-8591 compliant interface ensures rapid integration and immediate mission readiness.

- ✓ 400 rounds of .50 cal NATO standard ammunition
- ✓ Automatic ground operational capability for close support to army units
- ✓ Manned / Unmanned platforms adaptability

## Key Features

GUN SYSTEM

CKR-503

INTERFACE

MIL-STD-8591

POWER SUPPLY

28 V DC

STRUCTURE

Al frame, composite skin

- ✔ Max weight: 150 kg
- ✔ Adaptable to any manual / unmanned aerial platforms
- ✔ The CAKIR-503 (.50 caliber) gun system can be integrated
- ✔ Modular internal architecture for Air-to-Air reconfiguration
